

Director's Corner

We are pleased to announce that the center is now **officially accredited by NAEYC** until July of 2011. We are very proud of all the teachers for their dedication to the center and to providing an excellent program.

Cathy and Kathleen enjoyed the **GSA Childcare Conference** in Chicago very much. Their feedback: The whole event was very well run, with space available in all the workshops, plenty of staff to answer questions and give directions (and amazing food). We had the opportunity to meet with other directors and representatives from the same GSA region as ours and with Jennifer Bashford who is our GSA consultant. It was great to network with other centers and gain a better understanding of the GSA support we have.

Professional Growth for our teachers is available from the **STARS Program** as well as **Washington Scholars Program** that helps our teachers pay for community college classes with a small contribution from the center. We hope teachers will take advantage of this! Kudos to Rachel and Amos starting classes at North Seattle C.C. and Brenna at Seattle Central C.C!

Beth Goss returned in August for both a parent education and staff training. The parent topic was Limit Setting and the staff met with her for on applying the Problem Solving philosophy in the classroom. We plan to have her back for another parent training titled Sibling Rivalry on **Thursday October 3rd** from 12:15-1:15. in room 601 of our building. The parents who have attended have been very enthusiastic, well worth your time. We have another one scheduled on **Thursday December 7th**, topic to be announced.

PreK Room:

Co-Lead Teachers:
Rachel Bawara
Bryan Giese-Gardner

Welcome to Bryan, whose bio states: I'm a California native who graduated from Western Washington University in 2004 with my Elementary Ed. Certificate. Working with children, playing reggae music, training

in Kung Fu, Tai Chi, and Qi Gong, and writing are my passions. It is a pleasure helping young children gain a sense of community and wonder about the world we live in. I have been in progressive, child-centered schools since my first memories of my mother teaching preschool. And now I am a teacher like her. I believe children are capable, creative, and intuitive learners naturally, who just need to be encouraged to make choices about what they want to explore. Watching the pre-K learn reminds me that I have a long way to go before I am as flexible in my thinking as they are. Fell free to come visit our class any time to see what we are discovering.

Come see the **new room arrangements** and the loft that was redesigned by the kids! PreK is on the hunt for a **new class pet/mascot** so look for an upcoming new friend.

On August 28th Willow returned to say good-bye to the children who will be leaving for Kindergarten. The parents arranged for a cake, diplomas, and balloons. They met outside under a little canvas gazebo, and gave out diplomas with many photo opportunities. Fortunately the toddlers and preschoolers showed up to have a bite of cake.

The Pre-K kids have been to a non-profit wood workshop, **The Giving Tree**, to make something special! Each child is making one secret item for the auction and one to donate to the homeless so come to the auction to find out about this great item and their giving experience!

Preschool Room:

Lead Teacher:
Holly Koehler
Co-Teachers:
Amber Williams
Megan Bissonette,

Welcome to Holly, Preschool Room's new lead teacher. Holly has an AAS in Early Childhood Education and six years experience in Early Childhood classrooms. Holly's advice on Emergent curriculum: *Begin with a topic and see where the children will take it. Sometimes large projects are sparked, sometimes it takes a few days to take off and sometimes it last only a short time.*

She has been working with the Preschoolers on **"true tales."** She told them about seeing a mouse visiting her house. Afterward she asked what they thought should be done about this mouse, discussions followed and the class has been reading books featuring mice and playing with toy mice in the sensory table. In a day or two they will decide if the "Mice" topic is a hit or miss.

Emergent projects begin when a teacher observes an interest or introduces something that effects the classroom community, decides if there is enough that can be supported by curriculum, takes it to the children, and follows their lead by close observation and documentation. When a direction is established then materials and activities are introduced to encourage the children's further exploration of the subject.
